

Plus 4 You the first eco-espresso coffee machine

Energy saving up to **47.6%***

ENERGY SAVINGS

The Plus 4 You is a part of our Green Line, meaning these machines have a low environmental impact and can reduce energy consumption by up to 47.6%* compared to traditional coffee machines. The innovative software manages the automatic stand-by mode during non-peak periods and at night, therefore power is only distributed when and where it is needed. If the barista needs all groups to work, he can directly activate them from the keypad and they will be ready to operate at the programmed temperatures within 60 seconds.

NEW DESIGN

The strong and dynamic design gives the new Plus 4 You a very original sinuous line that wraps around three sides of the machine. The raised groups with extendable pull-out cup shelves are a novelty for the Astoria machines. Besides responding to the needs of the market they give greater openness and light. The new machine also comes with an LED light that illuminates the working area.

QUALITY & FLEXIBILITY

Each group head has its own water reservoir, so it is possible to adjust the machine at different temperatures for different coffee blends and thus always guarantee maximum stability and quality in the cup. With Plus 4 You it is possible to:

- program the temperature of each group head and water reservoir independently
- program the steam boiler pressure
- continuously produce steam with a dedicated boiler
- guarantee only the minimum temperature variations of the coffee water (max. +/- 1°C) compared to the set value.

ETHICS

The collaboration with Coffee Kids started when the machine was first put onto the market and has been going on for many years. Plus 4 You is a sustainable product in all meanings of the word. A part of the proceeds from the sale of the Plus 4 You go to this non-profit organization. The spirit and the mission of Coffee Kids is to improve the living conditions of families living on coffee plantations.

Technical Specifications		2 GR	3 GR	4 GR
Steam boiler capacity	qts	8.45	13.75	13.75
